Rockridge Resources (**TSX.V: ROCK**) is a public mineral exploration company focused on the acquisition, exploration and development of mineral resource properties in Canada, specifically copper and gold. Rockridge's general strategy is to go into historical, prolific mining districts with modern exploration techniques and methodologies to test new ideas and make new discoveries. Specifically, Rockridge is acquiring and rethinking projects with copper or gold as the primary credit, which are within reach of existing infrastructure in geopolitically favourable jurisdictions. The Company's core copper project is the Knife Lake Project located NW of Flin Flon in Saskatchewan which is ranked as the #3 mining jurisdiction in the world by the Fraser Institute. The Knife Lake Project is a remobilized shallow VMS deposit open along strike and at depth. There is strong discovery potential in and around the historical deposit area as well as at regional targets on the extensive property. The Company's core gold project is the Raney Project, which is a high-grade gold exploration project located in the same greenstone belt that hosts the world class Timmins and Kirkland Lake lode gold mining camps. Rockridge's goal is to maximize shareholder value through new mineral discoveries, committed long-term partnerships, and the advancement of exploration projects in mining-friendly jurisdictions.

Knife Lake Project

The Knife Lake Project area is an advanced-stage copper, silver, zinc and cobalt exploration property in Saskatchewan; extensive exploration from late 1960's to 1990's with the last documented work program completed in 2001.

Rockridge completed first work program in the last ~20 years in 2019, and published inaugural resource estimate:

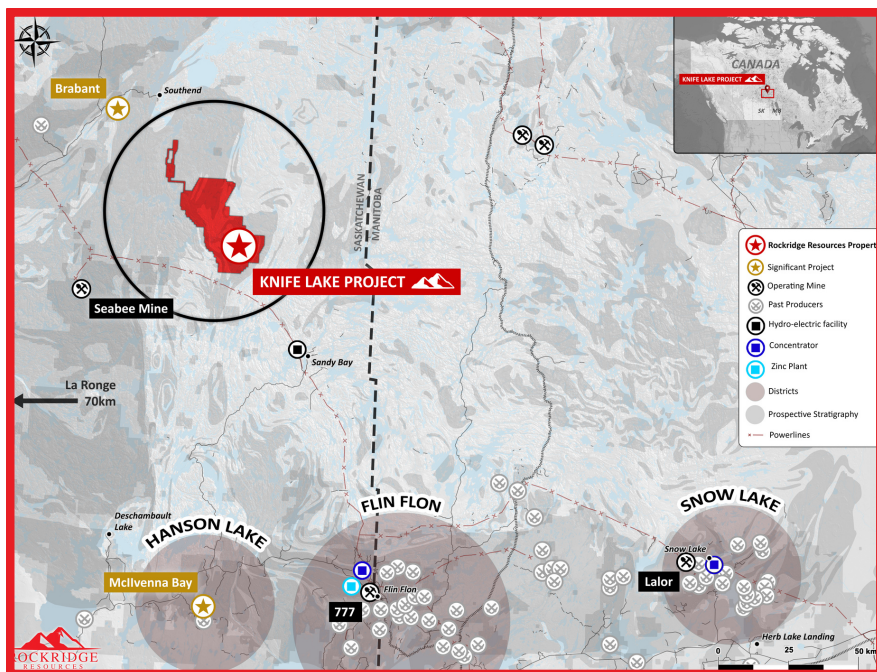

Ind. resources: 3.8 MT @ 1.02% Cu Eq.
Inf. resources: 7.9 MT @ 0.67% Cu Eq.

The Knife Lake Project is located ~130km NNW of Flin Flon, MB, in a similar geologic setting as the world class Flin Flon/Snow Lake metals belt.

There is strong discovery potential in and around the deposit as well as at regional targets on the Property; use modern exploration techniques and methods to make new discoveries.

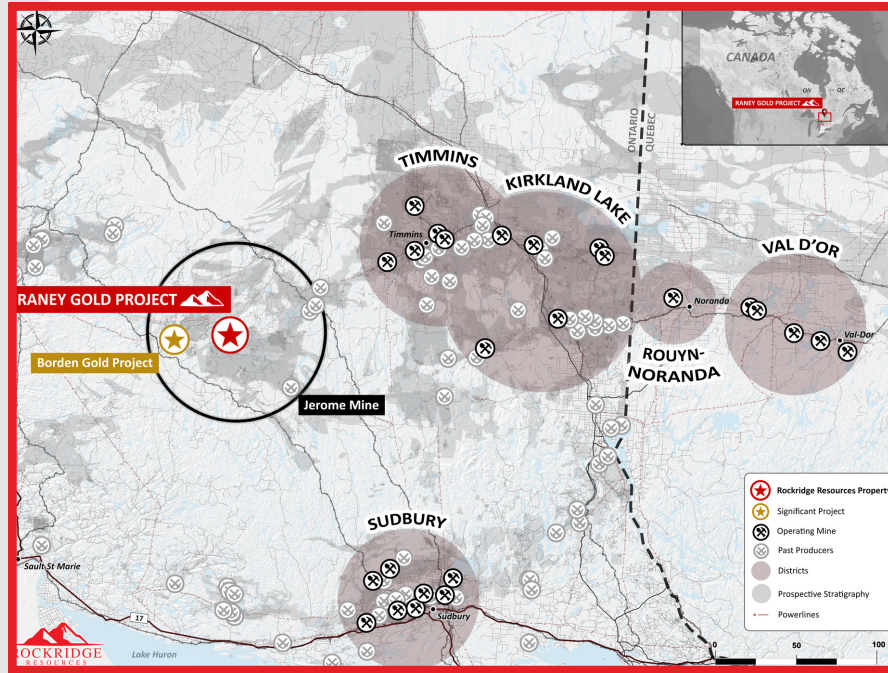

Deposit is a remobilized portion of a presumably larger "primary" VMS deposit; most of the historical work has consisted of shallow drilling at the deposit area with little regional work carried out and limited deeper drilling below the deposit.

Over 300 holes provided data for first NI 43-101 resource estimate of the shallow Knife Lake deposit.

Raney Gold Project

- Raney Gold Project is located in a similar geological setting that hosts the world class Timmins gold mining camp
- 2020 drilling programs entailed over 5,000 metres in 20 diamond drill holes; highlight intercept in hole RN-20-06 of 28 g/t gold over 6 metres (uncut)
- Broad alteration zone (structural corridor) that hosts the mineralization is open for expansion. Historic mapping and surface sampling data show that the alteration zone may extend over several hundred metres, with no drilling completed over a large extent of this corridor
- Project hosts excellent infrastructure; access and geological setting are advantageous for future resource development potential
- Newmont, the world's leading gold mining company, is very active in the region with its newest mine (Borden Mine) ~35 km W of Raney
- Rockridge recently completed its 2023 drill program consisting of 2,020m of drilling in 8 diamond drill holes
- Drill hole RN 23-22 returned 2.4 g/t gold over 7.5m starting at 249m, including 11.7 g/t gold over 1.0m from 251m. This represents a new exploration target at Raney Project at depth with some of the highest grade gold being discovered near the bottom of the hole
- Follow up drilling has recently commenced on the project aimed to fill gaps within areas of known mineralization and to ultimately design a larger program in the future

Team

Jordan Trimble, B.Sc., CFA Director & President

- An entrepreneur who has worked in resource industry specializing in corporate finance and strategy, shareholder communications, marketing, deal structuring and capital raising
- Current President and CEO of Skyharbour Resources (TSX.V: SYH)
- Previously Corporate Development Manager for Bayfield Ventures up until its acquisition by New Gold in 2014
- CFA Charterholder and served a full term as a Director of the CFA society

Jonathan Wiesblatt CEO

- 20+ years experience in the financial industry in various roles including focused expertise in the mining industry as an analyst and institutional investor
- He spent the last 15-years as an institutional investor working as a Portfolio Manager for several multi-strategy funds, a Canadian Equity Mutual Fund at Sprott Asset Management, as well as recently serving as an advisor to one of Canada's largest Family Offices, Reichmann International Development Corp.

Dr. Andrew J. Ramcharan, Ph.d. d., P.Eng, FAusIMM SVP Corporate Development

- Extensive background in corporate development, mining and exploration, project evaluation, and investment banking spanning over 20 years
- Previously, as Manager of Corporate Development for IAMGOLD, Dr. Ramcharan was involved in raising over \$600 million in equity financings and worked on project acquisitions totalling over \$800 million

Joseph Gallucci, MBA, ICD.D Director

- Currently Managing Director and the Head of Mining Investment banking at Laurentian Bank Securities
- Capital markets executive and banker with >15 years' experience focused on mining at BMO Capital Markets, GMP Securities, Dundee Securities; previously led Mining Investment Banking team at Eight Capital
- Directly involved in raising over \$1 billion for mining companies with a focus on base metals in Canada
